

Building or renovating?

Before you build or extend it's important that you check with us first.

There may be a South East Water easement or water/sewer service situated within one metre of the proposed works and if so you'll need our approval before commencing.

To assist you with building, South East Water offers a range of advisory services and publications. Simply call **131 694** or visit **www.southeastwater.com.au** for more information.
