ENGINEERING DESIGN SERVICES COVERED BY THIS REGISTRATION SCHEME

- (a) The design functions, for the different category of works, covered by this registration scheme include hydraulic, survey (when specified), and drafting, geotechnical, structural, mechanical, electrical, materials and other specialist functions required for a land development project.
- (b) Accredited Consultants while undertaking these design functions will be required to:
- (i.) Prepare detail design compatible with the Development Deed, Water Company's Concept plan and design parameters (as detailed in the Codes and/or Water Company requirements) co-ordinate other Design Specialists, organise production of design documentation, advise the Developer on technical matters relating to the works and visit the site when necessary.
 - (ii.) When necessary, justify any variation from the design requirements in the Code or any supplement requirements of a particular Water Company and obtain prior written approval from the Water Company for any variation from the Codes or any supplement requirements of a particular Water Company.
- (c) In addition to the design functions described above the Accredited Consultant shall also certify the as-constructed drawing and documentation satisfy the requirements of the Water Company.

AUDITING SERVICES COVERED BY THIS REGISTRATION SCHEME

Audit services, covered by this registration scheme include but are not limited to the following duties:

- (i.) Undertake construction auditing in accordance with the audit schedule to obtain confidence that allocated Land Development works are carried out and completed in accordance with the relevant Codes and/or Water Company requirements relating to the construction of Land Development works. Accurate records must be maintained by the Construction Auditor to verify compliance with the audit schedule and documented observations made on the worksite; and
- (ii.) Undertake a sufficient level of auditing to obtain confidence that allocated Development works are carried out and completed in accordance to with the Occupational Health and Safety Act, Regulations, Codes and Guidance notes and Australian Standards; and
- (iii.) Undertake a sufficient level of auditing to obtain confidence that allocated contract works are completed in an environmentally sensitive manner and to the customers' satisfaction; and
- (iv.) Undertake a sufficient level of auditing to obtain confidence that there is adequate liaison with contractors and authorities so that all have a clear understanding of the requirements and impact of the Development works.
- (v.) Issue written non conformance/Improvement notices if compliance with MRWA Standards have not been achieved on the worksite; and
- (vi.) Issue written non conformance/Improvement notices if any breach with the Environmental, Occupational Health and Safety Act, Regulations, Codes and Guidance notes has been identified on the worksite; and
- (vii.) Witness all Inspection and Testing activities relevant to the Development works and earthwork operations in accordance with the Australian Standards, MRWA Standards, Occupation Health and Safety Act, Regulations, Codes and Guidance notes, Local Government and Road Authority Codes of Practice and Water Company specifications; and
- (viii.) Witness all Acceptance Testing activities performed on the sewerage and water supply assets installed on the worksite. Accurate records must be maintained for general Water Company auditing purposes; and
- (ix.) Respond to customer enquiries and/or complaints relating to the construction of the Development Works.
