

Boneo Water Recycling Plant

Project update

Work continues to progress for the Boneo Water Recycling Plant upgrade. A smaller team is working on site with the main focus on commissioning the new Plant operations.

We expect works to be completed in early 2022. Once commissioning is completed site sheds and offices will be removed off-site and the area reinstated.

In the last month the construction team has completed:

- The new Recycled Water Treatment Plant.
- Pavement works across the site.
- Site lighting installation.

Commissioning works are underway for new areas of the Plant including the Recycled Water Treatment Plant and dewatering building.

The next significant milestone will occur when the new anaerobic digesters come online.

Need to get in touch?
